Profile

Creative Frontend developer who is thorough in details and well-established in the principles of software engineering. Has an experience in developing responsive and high-performance web apps with React.js, Next.js and contemporary UI frame-works. I am devoted to creating smooth user experiences and making sure design ideas work as multifunctional products. Skilled in teamwork and working alone in iterating frontend features end-to-end.

Experience

FRONTEND DEVELOPER | LOUDLYDEV GLOBAL SOLUTION | JUL 2024 – MARCH 2025

· Created scalable frontend applications by using React.js and Next.js.
· Dynamic content rendering via integrated APIs (RESTAPIs).
· Unified the designs and user interface and experience with the cooperation of backend and design teams.
· Used Git /GitHub source control and source code collaboration.
· Determined and corrected UI bugs as well as performance bottlenecks.

Projects

VALENCIA AUTO CENTER

· An auto trading site where one can purchase and sell cars.
· Created using React.js and Tailwind CSS
· Experience in the area of responsive design and component reusability.

SKILLED HANDS

· End-to-end system bridging the gap between talented employees and the people seeking employment.
· Made on Next.js with Firestore and Firebase.

· Job listing in real time and role-based authentication.

CARSFORSALENEARME

· Multi city car market.
· Came up with an active listing structure by city.
· Improved user interface and clean interface/filters.

PORTFOLIO & BLOGGER WEBSITE

· Personal publishing and blog publishing site.
· The React.js was used to develop it.
· Several parts: band portfolio, blog, contact form, etc.

Education

BACHELOR* OF SCIENCE IN SOFTWARE ENGINEERING | FEB 2026 | MUHAMMAD ALI JINNAH UNVERISTY, KARACHI, PAKISTAN

Skills & Abilities

· React.js (Hooks, Context API, Redux Toolkit, React Router)
· Next.js (App Router, SSR, ISR, API Routes)
· JavaScript (ES6+), TypeScript (basic to intermediate usage)

· Responsive & Mobile-First Design
· RESTful APIs (GET, POST, Auth)
· Git & GitHub (branches, commits, pull requests)
· Vercel, Netlify, GitHub Pages
· Postman (for API testing)
